

Let's talk about ETV as a tool for accelerating innovations for sustainable industrial processes

Organised by:

With the collaboration of:

Co-funded by the European Union

WEBINAR | 3 FEB

- 9.00 Welcome by LIFE ProETV coordinator**
Izabela Ratman-Kłosińska (IETU)
- 9.15 EIT Manufacturing's endeavours in the green transition of large industries**
Blanca Chocarro (EIT Manufacturing)
- 9.25 Applying innovations to IED installations: Challenges and opportunities - an IED installation operator perspective**
Piotr Czapryński - PGE Energia Ciepła S.A.
- 9.35 The challenge of providing innovative technologies and products with applications in IED installations - A technology provider perspective**
Irene Ylla (Itram - Christenys España)
- 9.45 Environmental Technology Verification as provider of information on green innovations with proven performance**
Izabela Ratman-Kłosińska (IETU)

- 10.00 EU policy framework - IED and its relationship with innovation and ETV**
Martin Weiss (European Commission - DG Joint Research Centre)
- 10.10 Innovation Observatory as a Policy support tool to reduce industrial emissions**
Alfredo López (Ricardo Energy and Environment)
- 10.20 EU policy framework - Zero Pollution Action Plan and ETV**
Joachim D'Eugenio (European Commission - DG Environment)
- 10.30 Discussion session - Contribution of ETV to achieve IED and Zero Pollution Action Plan Goals**
Rovena Preka, PhD (ENEA Italy)
- 10.40 Q&A session**
- 10.50 Wrap-up**

The webinar will be moderated by Marcin Wiśniewski, Ministry of Climate and Environment (Poland) - Industrial Emissions Expert

This project is co-financed from EU funds from the LIFE program, from the funds of the National Fund for Environmental Protection and Water Management (Poland) and from the funds of the Ministry of Agriculture (Hungary).
